Biocar

One, Two, we welcome you
on a ride you're gonna love to do
Three, Four, Grab the door
open up see what's in store
Five, Six, It's moving quick
are you ready? Let's split
Seven, Eight, Don't be late
Let's blast off I just can't wait

Have you ever wondered whether you could fly
Make a wish, we'll go together give it a try

We're gonna take you on a magic ride
Like a rocket blast into the sky
We can take you anywhere you like
Push a button Come on you can drive

Nine, Ten, Let's pretend
This rocket ride will never end
Eleven, Twelve, look at yourself
like a bird you fly so well
Mom and Dad would sure be proud
Flying high above the clouds
Moving fast, going far
You can drive the biocar

Have you ever wondered whether you could fly
Make a wish, let's go together, give it a try

We're want to take you on a magic ride
Like a rocket blast into the sky
We can take you anywhere you like
Push a button Come on you can drive

Ape Song

The apes are a bit like you and me
They're not so different because you see
(they) live in a structured society
and they've got their own territory

Gorillas and chimps and bonobos,
Gibbons and orangs and siamangs go:
Ooo Ooo Ooo Ooo Ooo Ooo, Ahh Ahh Ahh

Orangutans, check out those arms
Swinging through the branches,
they do no harm
But clever they are, can't you see
They can pick those locks
to escape and be free

The social apes are the chimpanzees
They really like anothers company
Most eat plants, but a few eat meat
Banana both hands, stand on back feet

Intelligent are the bonobos
After us, the smartest of the animals
But now they live in declining habitats
What do you suppose we can do about that?

Gorillas and chimps and bonobos,
Gibbons and orangs and siamangs go:
Ooo Ooo Ooo Ooo Ooo Ooo, Ahh Ahh Ahh

Gorillas are the biggest in a tug-of-war
they can beat six men and still ask for more
eating bamboo shoots and leave and vines
plants taste good even bark's just fine

The big boss is looking' he is the silver back
over six-feet tall he's the master, jack
If you meet a gorilla don't 'look him in the eye
'cause that means aggression,
and you don't want to die
Drop down and be quiet, eat a leaf,
the gorilla will be friendly if you make it brief

Gorillas and chimps and bonobos,
Gibbons and orangs and siamangs go:
Ooo Ooo Ooo Ooo Ooo Ooo, Ahh Ahh Ahh

Siamangs and gibbons are the lesser apes
They can swing through the trees
when they want to escape
Loud voices, many colors,
but they just can't swim
They were born to fly on the jungle-gym

The apes are a bit like you and me
They're not so different because you see
(they) live in a structured society
and they've got their territory

But now they live in declining habitats
What do you suppose that
we can do about that?
We can leave them a place in the world
all alone
We can leave them a place in the world
their own
Leave them a place in the world all alone
Leave them a place in the world their own

Gorillas and chimps and bonobos,
Gibbons and orangs and siamangs go:
Ooo Ooo Ooo Ooo Ooo Ooo, Ahh Ahh Ahh

Gorillas and chimps and bonobos,
Gibbons and orangs and siamangs go go:
Ooo Ooo Ooo Ooo Ooo Ooo, Ahh Ahh Ahh

They're not so different, not so different
than you and me
they live in a structured society
and they've got their own territory
banana both hands and stand on back feet

Quizanimals

Quiz animals, let's play quiz animals
we'll teach something's that you'd love to know

Jingle Jungle Joe

Hello people. I am Johoney
But you can call me Joe,
That's Jingle Jungle Joe
I want you to sing my song,
And it goes like this-

Where doe this might river roam
Straight to a family jungle home
They're swinging' from the trees
They live here wild and free
We would like you to meet the chimpanzees

Follow Jingle Jungle Joe
He can take you down a trail
To a jungle home
Follow Jingle Jungle Joe
Would you like to meet the apes
He can be your host

That sounds beautiful
Now, let's learn about the gorillas

They beat their chest just like a drum
Deep in the trees are where they're from
They're big and mighty tuff but all so full of love - We would like you to meet the gorillas

Follow Jingle Jungle Joe
He can take you down a trail
To a jungle home
Follow Jingle Jungle Joe
Would you like to meet the apes
He can be your host

I am Jingle Jungle Joe
Just follow me wherever I go
Come and sing my Jingle Tune
And all the apes will sing with you
Look there's a monkey and a baboon
Orangutans want to sing with you too
So come on learn the words sing my song

Follow Jingle Jungle Joe
He can take you down a trail
To a jungle home
Follow Jingle Jungle Joe
Would you like to meet the apes
He can be your host

Monkey Shine

Hey what's with the long face?
I don't know grandpa,
I guess I just don't feel all that happy today.
Hmm, sounds like you need a good dose of monkey shine
Monkey shine? What's that?

If you're ever feeling a little low
There's a couple things that you should know
Stick your tongue out of your mouth
Jump around make silly sounds
Funny face your troubles all away
and say....

Monkey monkey monkey shine
I like playing monkey time
Come and make a funny monkey shine
Monkey see as monkey do
I make funny faces too
Take the time to make a monkey shine

OH! Monkey shine! I get it.
Yes and it gets better!

Maybe something's got you feeling bad
No one likes to see you looking sad
(THAT'S NO GOOD!)
Put your thumbs inside your ears
Wiggle your fingers in the air
Jump around and say: OH OH AH AH AH !!!!!
(THAT'S GOOD!)

Monkey monkey monkey shine
I like singing monkey rhyme
Come and make a funny monkey shine
Monkey see as monkey do
I make funny faces too
Take the time to make a monkey shine

Monkey monkey monkey shine
I like singing monkey rhyme
Come and make a funny monkey shine
Monkey see as monkey do
I make funny faces too
Take the time to make a monkey shine

Monkey monkey monkey shine
I like playing monkey time
Come and make a funny monkey shine
Monkey see as monkey do
I make funny faces too
Take the time to make a monkey shine
